

AASHTOWare Project 3.01 Now Available!

The AASHTOWare Project Task Force is pleased to announce that the AASHTOWare Project 3.01 software is ready for download!

The AASHTOWare Project 3.01 software includes enhancements to the AASHTOWare Project Civil Rights & Labor™, AASHTOWare Project Construction & Materials™, AASHTOWare Project Estimation™, and AASHTOWare Project Preconstruction™ software. Key updates include:

- A Field interviewer mobile app
- Significant improvements in system performance
- Windows 10 for laptops and tablets
- Construction force accounts, meeting notes, & environment compliance
- Estimation cost sheets
- Advances in AASHTOWare Project Civil Rights & Labor payroll features

AASHTOWare Project Construction & Materials: Construction functionality - force accounts, contract documents, contract meetings, design evaluation, plan discrepancies, and storm water reporting; materials functionality - approved product list, material sets, materials grid.

AASHTOWare Project Preconstruction: Quick-add functionality when in addendum phase, valid for bidding flag in purchase, an agency option to allow assigning fund packages at specified levels and automatically assigning funding to new items.

AASHTOWare Project Civil Rights & Labor: Ability for the prime to add a sub's payroll, conformance process, and agency modification of the payroll exceptions process.

AASHTOWare Project Estimation: Cost-based estimation tools and estimation analysis reports.

Cross-module: Agency view grid, ActiveReports report model tool to help with report customizations, and authorization manager service for data access (via the ODATA protocol).
