

AASHTOWare Project Data Analytics™

The time has come for agencies to have the ability to perform data analytics in a software that is tailored specifically to the highway construction field. **AASHTOWare Project Data Analytics™** will provide the ability to perform data analytics in web-based AASHTOWare Project and Software-as-a-Service (SaaS) environments.

Key Highlights Include:

- **Drives** key performance indicators based on historical analysis
- Quickly analyze vendor bidding **patterns** for irregularities
- Display key information on a **map graphic** to aid in interpretation of data
- **Dashboard** display of construction portfolios
- **Integrated** with the AASHTOWare Project software and built to maximize the potential of the AASHTOWare Project unified database
- Breaks down departmental silos by **using and analyzing all data** from the estimate, letting, bids, construction, materials, civil rights and labor
- **Accessible** from anywhere, mobile-friendly
- **Interactive analysis tools** built specifically for agency construction management business needs
- Agencies will be able to respond more quickly and accurately to citizen, legislative, and vendor requests with user-friendly tools **accessing current data**
- Future planning is improved, as it can be based on current, broader sets of information that are **more accurate**
- Use of **industry-standard third-party tools** for additional analysis, visualization, and reporting
- **Minimal user training**, with a low-complexity product and simple navigation
- Use of the **Software-as-a-Service (SaaS) platform** keeps the product at the latest production version and the technology remains current
- Agencies are **no longer required** to license the SAS statistical analytical tool
- A **rapid delivery model** allows new features to go live quicker
- **No agency deployment** needed as the SaaS is in a hosted environment, minimal IT support
